

Reduce storage costs while safeguarding performance with Computacenter and IBM

Data volumes are growing, while storage budgets are shrinking. To cope with this challenge, organisations need more efficient storage solutions. Computacenter helps organisations source, deploy, manage, and optimise the latest storage solutions from IBM so they can adhere to budgetary requirements while meeting business needs for high performance storage.

Customer drivers

More apps. More customers. More data. To meet today's storage needs, organisations need scalable solutions that can simplify data management across hybrid environments.

As well as contending with higher volumes of data, IT departments must meet tight budgets and ensure all new purchases align with sustainability directives.

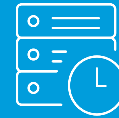

Computacenter and IBM solution

Computacenter and IBM offer storage solutions designed to support mission-critical workloads while minimising carbon emissions and cost.

For example, IBM FlashSystem offers dense, energy-efficient data storage with a smaller data center footprint.

Leveraging the latest technologies, IBM FlashSystem offers fast response times, low latency, and high availability.

Efficient data storage from Computacenter and IBM

- High availability and performance for mission-critical workloads
- Greater sustainability
- Smaller data center footprint
- Scalability to support business and data growth

Computacenter helps organisations maximise their investment with IBM FlashSystem with proven services, including:

Advisory Services

We help define your storage needs in alignment with your business strategy, so you can select the best-fit IBM storage solutions to support both current requirements and future plans.

Deployment and Integration

We design and deploy IBM storage infrastructures that integrate seamlessly with your existing IT environment, based on your specific business needs and budget.

Migration

With years of experience and expertise, we provide the resources and processes that help ensure a seamless migration and minimise disruption. Working with Computacenter, you can accelerate time-to-value, reduce risk, and decrease the cost of your IBM storage migration.

With Computacenter and IBM, organisations can reduce costs and carbon emissions without compromising performance.
