MAXIMISE PRODUCTIVITY WHEREVER YOU WORK

Digital tools and online collaboration are fundamental to how we work today. Yet these capabilities call for devices that deliver premium performance with power efficiency, Artificial Intelligence (AI) accelerated experiences and lightning-fast connectivity from anywhere.
Enterprise laptops powered by Snapdragon® compute platforms, sets the standard for a new generation of AI PCs. Built to unlock peak performance in the workplace. With best-in-class performance and efficiency, incredible battery life, and enhanced security features, these devices help maximise employee productivity in every location, whether at home, in the office, on the move, or in public spaces.

LET'S GO →

A CONTEMPORARY USER EXPERIENCE FOR MODERN WORKING

From always-on connectivity and convenient portability to long battery life and AI-driven power to run advanced apps, capabilities are well matched to the needs of modern working environments.

Unlike laptops with a CPU and separate processing modules, the Snapdragon® X Elite Compute Platform assembles multiple processing capabilities on a single powerful and compact chip in a design known as System on Chip (SoC). This tight integration delivers the most powerful, intelligent, and efficient processor in its class for Windows PCs.

ENABLING PRODUCTIVITY, ANYWHERE

The Snapdragon processor's SoC layout has a very low power consumption. This gives employees the freedom to work from anywhere:

- **Multi-day battery life*:** Conquer the most intensive projects, multitask for hours, and make meetings count— from virtually anywhere—with a PC battery that can last for days*.

- **Game-changing performance & power efficiency:** Copilot+ PCs powered by Snapdragon are ultra-responsive with revolutionary performance per watt, allowing employees to achieve more across workloads on a single charge.*

- **Smarter User Experiences:** Bring mobile experiences directly to your PC. Stream, download, and sync from virtually anywhere with lightning-fast 5G and Wi-Fi 7 with HBS Multi-Link for seamless, jitter-free cloud connectivity.

With 5G/4G LTE, WiFi and Bluetooth built in, laptops powered by Snapdragon keep employees always connected.

* Battery life varies significantly with settings, usage, and other factors - vs. i7-1360P and i7-1355U
MORE EFFICIENT COLLABORATION

On-device AI capabilities enabled by Snapdragon X Elite can enhance employee collaboration:

- **More engaging interaction:** The gaze correction feature keeps the user's eyes appearing to point at the camera even when they are looking down at their notes.

- **Fewer distractions during meetings:** Noise suppression eliminates environmental sounds such as barking dogs or a noisy café background.

- **Better visual interaction:** Auto-framing keeps users in focus during a video call whether they are sitting, standing or moving around.

- **More professional encounters:** Background blur softens the environment around the user for a cleaner appearance than the often jarring blur effects of video conferencing apps.

STAYING SECURE

Snapdragon X Elite has a Microsoft Secured-core certification. With a persistent connection, IT departments are able to support employees from a distance by monitoring device performance in real-time, proactively addressing issues as they arise, and ultimately keeping work in motion.

COMPUTACENTER PUTS IT ALL TOGETHER

Computacenter services help organisations to match the right tools, devices and processes to each employee's preferences and work needs. That means employees gain from the delivery of the most appropriate IT capabilities to help them do more.

Computacenter has the experience and modern Autopilot/Intune-driven methodologies to deploy and seamlessly integrate devices powered by Snapdragon so employees can start using their devices within minutes, not hours.

DISCOVER MORE

To learn more about how Computacenter can help enhance your ways of working with laptops powered by Snapdragon, please contact your Computacenter Account Manager, email **enquiries@computacenter.com** or call **01707 631000**.

Snapdragon branded products are products of Qualcomm Technologies, Inc. and/or its subsidiaries.

About Computacenter

Computacenter is a leading independent technology and services provider, trusted by large corporate and public sector organisations. We are a responsible business that believes in winning together for our people and our planet. We help our customers to Source, Transform and Manage their technology infrastructure to deliver digital transformation, enabling people and their business. Computacenter is a public company quoted on the London Stock Exchange (CCC.L) and a member of the FTSE 250. Computacenter employs over 20,000 people worldwide.
