

# 10 Ways to Imagine a Better Experience

## Imagine if...

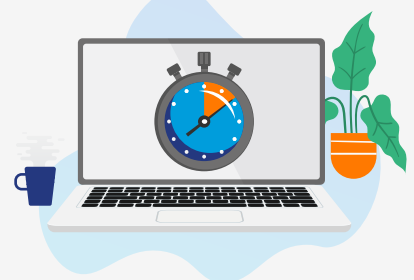

1

Your laptop could help you do things you that previously needed a cloud-based AI to process.

2

You could get up and running on your laptop from the comfort of your home, in minutes.

3

Your laptop and your apps stayed secure and up to date.

4

You could use AI services even when you're not online.

5

Your laptop kept performing like it was fresh out of the box permanently.

6

Your laptop didn't need charging every day, didn't need a fan and never overheated on a Teams call.

7

You could do all this on a super-light, great looking device.

8

These next-gen devices are as affordable as the classic laptops you're used too.

9

Next-gen AI laptops, easily deployed and managed via Autopilot and Intune, unlock AI-only features on Windows 11.

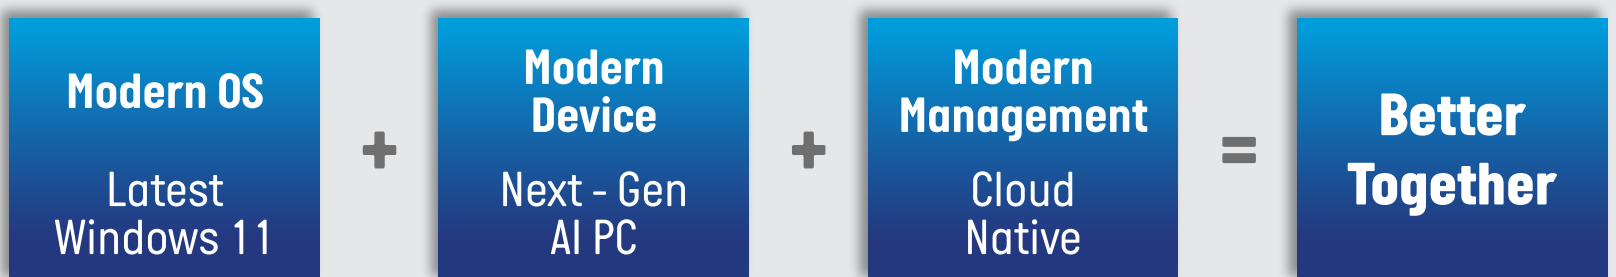

10

All of this made you 10% more productive.

## Imagine if you were the one to tell your company about this

It's time to imagine a better experience for your people

Computacenter can help you make it a reality
